

CALL FOR EXPRESSION OF INTEREST TO CO-IMPLEMENT THE PROJECT: Women Voice and Leadership (WVL) Project.

Background

CARE-International, in Uganda, in collaboration with CARE Canada secured funding from Pathy Family Foundation to implement a five- year project (2023-2027) with the overall goal to improve the performance of Women's Rights Organizations (WROs) and youth led organizations (W/YLOs) to deliver effective women and girls' health and economic rights programs in refugee/ IDP settlements and host communities of West Nile, Northern Uganda. **The Women Voice and Leadership project**, will be delivered through four key outputs, which include:

1. Providing Multi-year grants to WROs and W/YLOs serving refugee/IDP settlements in Uganda
2. Capacity building support to grant recipients to strengthen and sustain their organizations and improve their work on women and girls' health and economic rights.
3. Grants, funding, and organizational support to networks of WROs and W/YLOs working on women's health and economic rights policy and advocacy.
4. Capacity building support provided to targeted networks of WROs and W/YLOs to strengthen their ability to raise their voices, influence and advocate on women's health and economic rights. The project implementation scope covers West Nile and Northern Regions of Uganda.

The project will apply CARE tested learning tools and models from its partnerships. Community structures such as women and youth savings and lending economic groups will participate in the WVL project's advocacy dialogues aimed at questioning gender norms and promote the rights of women and girls. Networks will be built by the WROs and W/YLOs to collectively decide on their advocacy priorities and activities within themes on women's economic and health rights to create systems change, with facilitation and support from CARE.

The **purpose** of the project is to contribute to gender equality and increase the enjoyment of human rights by women and female youth by improving the governance, management, programming, and sustainability of **Small Local** WROs and W/YLOs in West Nile and Northern Region of Uganda.
